SUMMARY

A disciplined and results-driven Software Engineering student with strong teamwork and collaboration skills, excelling under strict deadlines and high-pressure situations. Thrives in structured environments, remaining resilient and focused while delivering quality outcomes. Committed to continuous learning, leadership, and contributing meaningfully to organizational success

EDUCATION

Pak-Austria Fachhochschule

Bachelor of Science in Software Engineering
2022 - 2026

SKILLS

- Front-End:** HTML, CSS, JavaScript, JQuery, and React
- Backend:** PHP, Node.js
- Database:** MySQL, MongoDB, Firebase
- Tools:** Github, Git
- C++ (OOP & DSA)
- Teamwork,
- Collaborative work
- Problem Solving
- Critical Thinking
- Version Control

CERTIFICATION & COURSE

- Ethical Hacking Essentials**
EHE CEH: EC - Council
- Full-Stack Web Development (Completed)**
HTML, CSS, Bootstrap, JavaScript, JQuery and PHP
- Web Engineering (Present)**
MERN Stack web development

VOLUNTEER WORK

- AI - Society, PAF-IAST**
Director Media | 2024 - 2025
- Human Right Council, KP**
Social Media Lead | 2024 - Present

PROFESSIONAL EXPERIENCE

Web & Software Developer Intern

Entechin, Islamabad | Aug 2024 - Sep 2024

- Worked on various web development projects using HTML, CSS, JavaScript, and React.
- Developed software applications utilizing C++ for backend processes.
- Contributing to both web and software development projects.
- Gained experience in remote collaboration, project management, and delivering high-quality web solutions.
- Strengthened problem-solving skills by overcoming design and development challenges.

Front-end Web Developer Intern

Sabzland, Haripur | Aug 2023 - Oct 2024

- Worked collaboratively as part of a web development team.
- Gained hands-on experience in web development technologies, focusing on HTML5, CSS3 and JavaScript.
- Contributed to building and improving web-based solutions for the company.
- Developed teamwork and communication skills through collaboration with other interns and team members.

Projects:

- EarningInk:** A dynamic blogging platform built for writers to share, grow, and monetize their content within a thriving community.
- Grocery Management System:** A C++-based shopping system with separate user and admin logins, product management, and invoice generation.
- Car Rental Management System:** A C++-based system for managing car rentals, bookings, and user interactions.
- HRC-AJK Website:** A web platform for HRC-KP (currently under development).
- OLX for PAF-IAST:** A university-focused e-commerce platform for buying and selling products within the campus community.
- Portfolio Website:** A responsive React.js-based personal portfolio showcasing projects, skills, and professional experience with a clean UI and optimized performance.
